1. In view of the appeal brief filed on April 28, 2006, PROSECUTION IS HEREBY REOPENED. New grounds of rejection are set forth below.

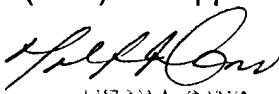

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1761

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 2, 5-11 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harada (JP Abstract 53034957A) taken with or without Bender et al. Harada discloses treating fish eggs with an alkali solution, e.g. sodium carbonate or sodium bicarbonate. With Bender et al, it would have been obvious to wash or neutralize the alkali treated fish eggs in Harada since it is well known to wash or neutralize alkali treated fish material, as evidenced by Bender et al (cols. 4-5). Without Bender et al, it would have been obvious to wash or neutralize the alkali treated fish eggs in Harada since it is conventional to wash or neutralize any food material which has had its pH altered, prior to consumption thereof.

5. Claims 12, 13, 16-20 and 22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Harada. Any differences that may exist between applicant's alkali treated fish egg product and the alkali treated fish eggs in Harada are deemed to be obvious.

6. Claims 1 and 21 are objected to because of the following informalities: In claims 1 and 21, line 6, "and wherein" should be added before "said" (2d occurrence). Appropriate correction is required.

7. Applicant's arguments with respect to claims 1, 2, 5-13 and 16-22 submitted April 28, 2006 have been considered but are moot in view of the new ground(s) of rejection.
